The screenshot displays a database management interface. At the top, a status bar indicates "movie_theater - Warning - not supported". Below this, a toolbar contains various icons for file operations and query execution. The main area is a SQL editor titled "Query 1" with a "Limit to 1000 rows" option. The SQL code is as follows:

```
1 CREATE DATABASE movie_theater;
2
3 USE movie_theater;
4
5 CREATE TABLE users (
6     id INT AUTO_INCREMENT PRIMARY KEY,
7     name VARCHAR(50) NOT NULL,
8     email VARCHAR(50) NOT NULL,
9     phone INT NOT NULL,
10    password VARCHAR(50) NOT NULL,
11    created_at timestamp,
12    updated_at timestamp
13 );
14
15 SELECT * FROM users;
```

Below the SQL editor, a progress bar shows "100%" completion and a timer of "1:14". A toolbar for the results section includes "Result Grid", "Filter Rows", "Search", "Edit", and "Export/Import". The "Result Grid" is active, displaying a table with the following columns: id, name, email, phone, password, created_at, and updated_at. The table is currently empty, with all cells showing "NULL". On the right side, a vertical toolbar contains icons for "Result Grid", "Form Editor", "Field Types", and "Query State". At the bottom, a status bar shows "Query Completed" and buttons for "Apply" and "Revert".
